TR_Trade_Show — Staff Guide

Step-by-step instructions for creating, counting, returning and reporting on Trade Shows • Version 1.0

1. Open Trade Show

Sign in to WSC. On Home, select TR – Trade Show. If a Trade Show is already open, the Home button may be yellow; expand it to locate the session and resume it.

2. Create a Trade Show

On the Trade Show screen, enter the show name, start date and end date, then select Create Trade Show. WSC assigns a unique reference such as TR-000001.

3. Record products taken

While the show is in progress, select Scan QR Code or enter the SKU and choose Find Product. Check the product details, enter Quantity Taken, then select Save to Trade Show. Repeat for each product.

> Check the SKU and quantity carefully before saving. The Trade Show reference identifies this particular event.

4. Review and amend quantities

Use Review Products Taken to see the items recorded. The list is alphabetical. If a quantity is wrong, select Amend, enter the corrected quantity and save. The amended quantity replaces the previous one; the system keeps an amendment history.

5. Resume an unfinished Trade Show

Return to Home and open the yellow TR – Trade Show section if one is shown. Select the relevant Trade Show to continue recording or reviewing products.

6. Enter returned products

From the day after the show’s end date, the normal product-taking and review controls are hidden. Open Returned Products. Enter the quantity returned for every item; enter 0 where nothing came back.

> A returned quantity cannot be greater than the quantity recorded as taken. Check all return figures before confirming.

7. Confirm the returns

Select Confirm Returned Products. Once the returns are saved, WSC takes you to the Trade Show report. You can also use Go to Report to return to it.

8. Check the final report

Review the TR number, show name, dates, products and quantities. If a figure is unexpected, stop and ask a supervisor to investigate before any QuickBooks submission.

9. Email or submit the report

Select Email Report to send a copy to the intended recipient. The Commit to QB action is for authorised staff only and must be used only after the report is checked and approved.

> Important: Committing a report can change live inventory once production QuickBooks is enabled. Never press Commit to QB merely to test the screen.

Final checklist: Correct show and dates • All products taken recorded • All returned quantities entered • Report checked • Any QuickBooks submission authorised.
